Vaagdevi College of Pharmacy conducted a program on "CONFIDENCE BUILDING: MAKING THE MOST OF YOUR POTENTIAL" to B. Pharmacy students. This program accentuates mainly on importance of confidence in perceiving your goals. Confidence is a state of mind and cannot be achieved through a set of rules but it needs one to have faith in themselves. The main step to improve the self confidence is achieved through positive thinking, talking to others, training, knowledge and practicing.

Mode of Session: Online

Number of students participated: 36.

Vaagdevi College of Pharmacy organized a training program on "IMPORTANCE OF VOCABULARY BUILDING" for the students of B. Pharmacy. Vocabulary refers to the collection of words that a person knows and uses. Vocabulary development is the process of acquiring new words. Developing an extensive vocabulary requires reading publications covering various subjects and texts, including magazines, textbooks, novels, etc. One of the best ways to increase vocabulary is through repetition as it gets embedded in the brain. Focusing on vocabulary is useful for developing knowledge and skills in multiple aspects of language and literacy. Types of Vocabulary include:

- 1. Speaking: Speaking vocabulary consists of the words that can speak aloud. Containing around 5000 to 10,000 words, these words are used for communicating and giving instructions.
- 2. Listening: Listening vocabulary is the words we can understand through hearing them said aloud. Similar to the speaking vocabulary, we use these words to listen to what others are communicating to us and what they might be instructing us to do.
- 3. Reading: Reading vocabulary is how many words we can understand when reading. Reading is also the main way to build and grow vocabulary as you read, you encounter new words you may not have seen or heard before.
- 4. Writing: Writing vocabulary is determined by the words we can spell and use correctly in context. People's writing vocabulary is typically smaller than their speaking or listening vocabulary, which is why it's essential to work on it and keep learning new words.

Mrs. Safia Sultana explaining the importance of Vocabulary Building

Number of students participated: 36

Vaagdevi College of Pharmacy organized a training program on "CARDIO-PULMONARY RESUSCITATION" (CPR: A Life- Saving Process). The program was conducted to Pharm.D students. This training helps to understand the importance of CPR and continue the process of blood flow through the body, to restore cardiac arrest and to restore partial flow of blood to the brain and heart to prevent brain damage. The brain can sustain the damage after blood flow has been stopped for four minutes but irreversible damage is seen after seven minutes hence, CPR is effective only if performed within seven minutes of the stoppage of blood flow.

Vaagdevi College of Pharmacy organized a training program on "GRAPH PAD PRISM SOFTWARE" mainly for the students of Pharm.D in their thesis or project work by Dr. E. Venkateshwarlu. Graph pad software is a commercial 2D graphing and statistical software. This software is a versatile statistical graphing that is used in analysing the data in a simplified way. This also helps in the study of qualitative and categorical data and makes it easy to enter data accurately, and to create simplified graphs. It offers a broad variety of analyses from standard to very specialized like t-test, one-way or two-way and three-way ANOVA, linear or nonlinear regressions and many more. The main goal is to simplify the complexity of statistical data and it also helps in coding the data and graphs and results are auto updated through this software which helps in time saving and better accuracy.
